

Weekly Report (2017.11.13-2017.11.19)

TASK	DEADLINE	CURRENT PROGRESS
可视交互引擎论文	11.25	目前进展：阅读论文，撰写内容 存在问题：英文写作比较生疏，长句与短句的应用生疏，内容不够丰富 计划：参考学习优秀论文的措辞、写法，多读些论文

Done

1) Configure and learn how to use Ctex, including document layout and organization, edit mode of graphics, tables, illustrations, documents, etc.

2) Paper reading:

A Survey of Visual Analytic Pipelines. This paper reviews the previous work on visual analytics pipelines and individual modules from multiple perspectives: data, visualization, model and knowledge. Maybe some part of content can be cited in visual interactive engine.

Heading toward Artificial Intelligence 2.0. I mainly learn the writing method of this paper.

Exploring the Design Space of Composite Visualization. This is a fundamental work. I haven't finished it yet. This work proposes the notion of composite visualization views (CVVs).

3) Paper writing: start from research status, the content is not much.

4) Nourishing the stomach. Cook myself with little oil, and bring the bento to the laboratory. After a week, it doesn't hurt so much before and after dinner. The gastroscope infected my throat which makes me change my voice and even can't talk. So it takes another morning in this week. Fortunately, I feel better now. Health is so important that I don't want to spend any time in hospital.

To Do

1) Write papar.

2) Read paper about Low-Level Tasks.
